STAYCATION TIPS

What would summer be without our summer cafés?

Summer is for many synonymous with coffee excursions, so it's no wonder that the number of cafés around Skellefteå is multiplied during the summer. Isboden, Svedjan Bageri, Lanthandeln, Skråmträsk Kvarn and Edelviks trädgårds-café to name a few. Scan the QR code for more café tips.

JON OSKAR'S TIPS ON LOCAL PRODUCERS

There are many talented producers around us, which was one of the reasons we chose to start **Bryggargatan** in Northern Sweden. **Svedjan Ost** is one of those, where Pär and Johanna continue to tirelessly strive towards the perfect cheese.

Strömsholm Lantbruk has a focus on premium beef meat. Although most of his production is made for us restaurants, Simon makes sure individuals can stop by the farm shop to buy extra fine dry-aged meat.

Our two local breweries: **Fermenteriet**, which since inception has dared to stick their neck out and go their own way, and **Skellefteå Brewery** which is a natural element of every summer.

Ögin Distillery is one of Sweden's smallest craft distilleries. Ögin's gin is distilled with carefully selected and hand-picked raw products by the sea in Boviken to then mature in harmony with nature.

ENJOY SUMMER AT AN OPEN-AIR CAFÉ

Never before have outdoor terraces felt so important as this summer. To enjoy food and spend time with loved ones.

We have collected most of the open-air cafés in one place so you will not have to search: visitskelleftea.se/open-air-cafe

Taste of Skellefteå

During the summer months, when the sun barely sets and the days go unnoticed into the evening, there is nothing better than sitting at an outdoor terrace with loved ones. Add delicious flavours, innovative menus, local products as well as good service and you get great restaurant experiences waiting for you. Scan the QR code for more restaurant tips.

ISABELL'S FAVOURITES

Burträsk Saluhall gathers several local producers in the same room. It is such a cozy place where you buy directly from farmers, avoiding all intermediaries

KRAV-certified **Bergmark Gärd** has a really nice shop where they sell beef from their own cows. The cows graze outside for most of the year with a great view over the Lillvattnet lake.

You can also buy food directly from local producers at **REKO-ring**. Place your orders in the REKO-ring Skellefteå group on Facebook and retrieve the goods at their physical markets.

STAYCATION TIPS

FISHING TIPS FROM JONATHAN THE GUIDE

Dare to try fly fishing! I meet many through my work who never dared to try fly fishing but who are ecstatic after their first fish caught with a dry fly. One tip is to fly fish for pike. Pikes are often willing to bite.

Practice your fishing-eye. Take your coffee thermos out and take the time to analyze the water before you throw the first throw. Where can the fish be? Is there any special structure on the water? This way, your fishing will be become more effective and enjoyable over time.

Dare to ask - get help. Do you find it difficult to plan your fishing? Ask local fishermen, the fishing shop or why not hire an experienced fishing guide for maximum fishing luck!

Easy access fishing waters

The Skellefteå area offers great fishing opportunities in both the river and the sea. The **Byske river** is one of Sweden's best salmon rivers and pikes lurk in the reed beds of our lakes. The Skellefte river is perfect for sea trout and salmon for those looking for an **urban fishing experience**.

Pssst. Most fishing is free for young people up to 16. Scan the QR-code for more tips.
